

a. Given a number as input from the user, print all its odd multiples from 1 to 21 if the number is odd and all even multiples from 2 to 20 if the number is even.  
Use both for loop and while loop.

b. Given a number as input from the user, print a triangle like the following.

if input is 3:

```
*  
**
```

---

```
**  
*
```

if input is 5:

```
*  
**
```

---

---

---

---

---

```
**  
*
```

give codes containing for loop and while loop
