

**Write a program to PRINT numbers from 1 to N , with conditions :**

- a) If number is divisible by 7 , print("HI")
- b) If number is divisible by 11 , print("BYE")
- c) If number divisible by both 7 and 11 , print ("HiBYE")

**Also, find the Time complexity for the algorithm.**

Example : -

N = 12

Output :

Hi

BYE
