Today's CC is about you.

You need to create an "About Me" HTML page similar to shown below:

Create a page about you with HTML and CSS having:

   i.    A heading with your name.
   ii.    Your/dummy profile picture.
  iii.    A short paragraph about you.

Note:

- You must create 1 HTML and 1 CSS file and link those together. (No internal/inline styles should be present in your HTML file)
- You must add more content to the page (like favorite movies, books etc.) however, you have the freedom to style the content in your own creative ways.
- The above three content (Image, heading and paragraph) are mandatory.

- You can go beyond and add additional styles to make your webpage more pretty
